B

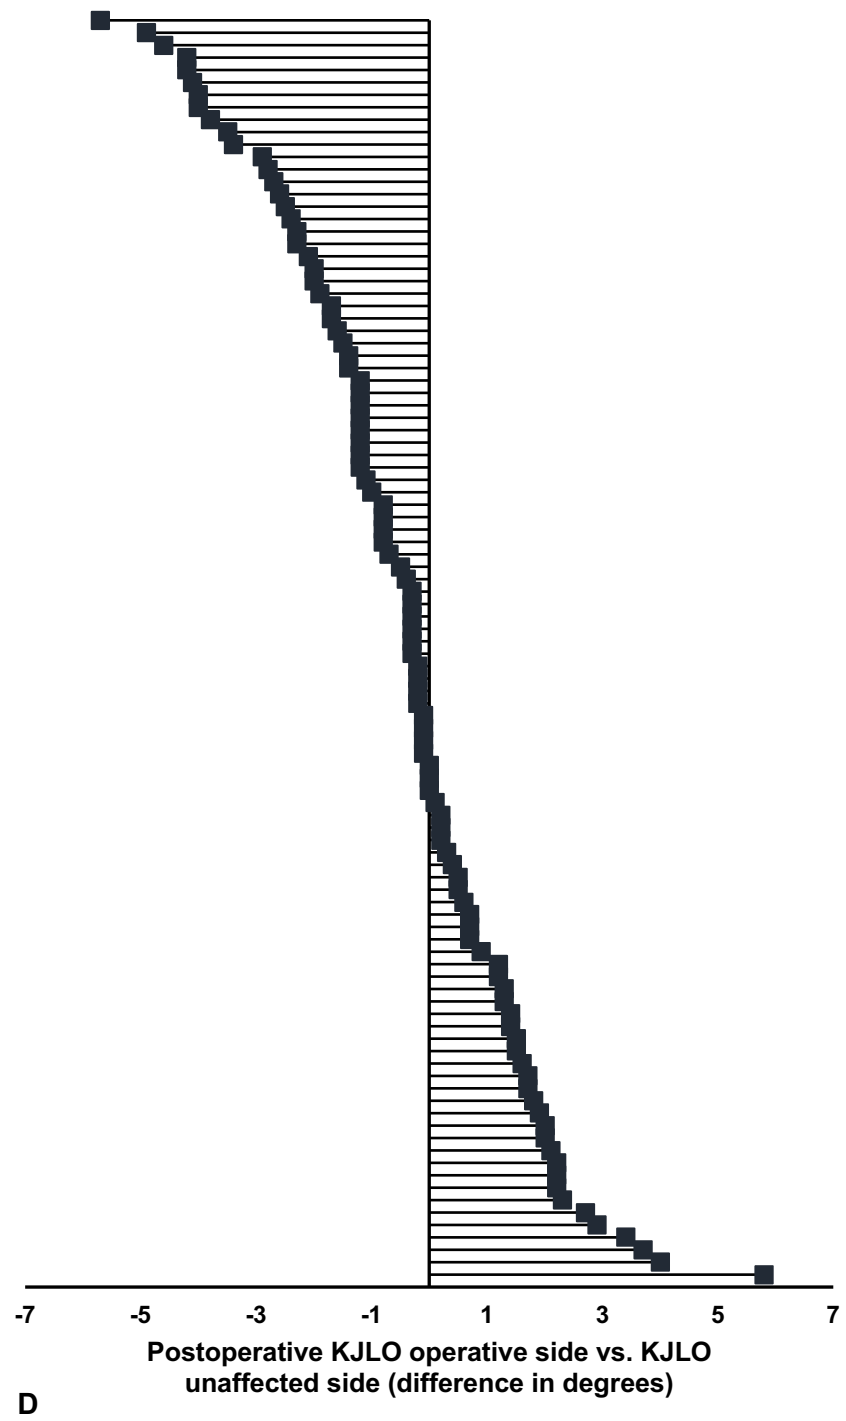

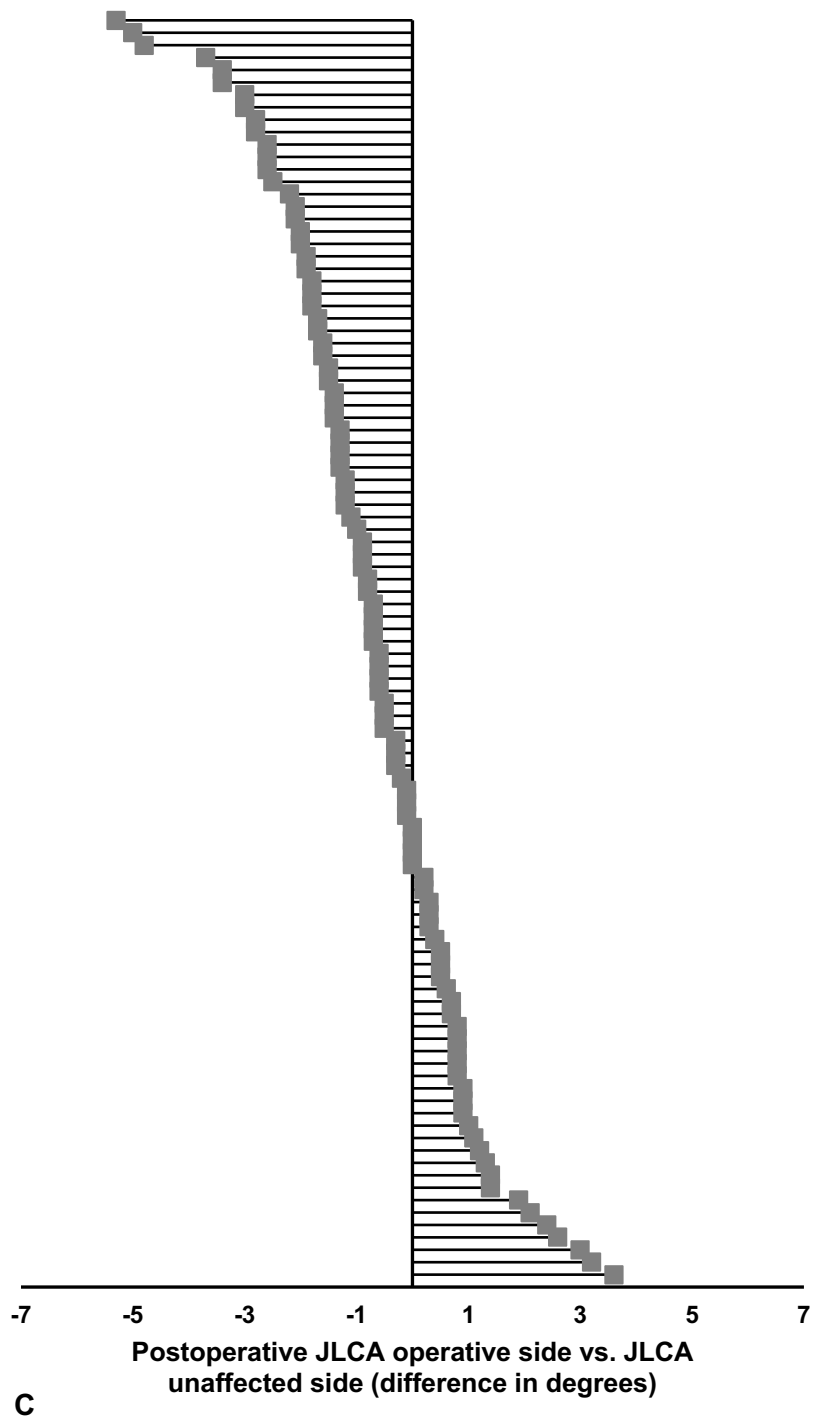

Figure 1. Distribution of the difference in degrees between postoperative alignment following medial unicompartmental knee arthroplasty, and estimated pre-arthritic alignment. **A**, postoperative mechanical hip-knee-ankle angle (mHKA, i.e., mechanical axis) of the operative knee versus arithmetic hip-knee-ankle angle (aHKA, i.e., pre-arthritic mechanical axis). **B**, postoperative mHKA of the operative knee versus mHKA of the contralateral unaffected knee. **C**, postoperative joint line congruence angle (JLCA) of the operative knee versus JLCA of the contralateral unaffected knee. **D**, knee joint line obliquity angle (KJLO) of the operative knee versus KJLO of the contralateral unaffected knee.
